Well Test Data Acquisition System

Vesta WT-012 is a wireless/wired DAS which was designed and developed for well testing jobs. WT-012 supports 10 channels of analog and digital inputs which can be configured in Vesta_DAS software in a user friendly GUI. WT-012 has an internal Wi-Fi and supports industrial ethernet cable for connecting to Vesta_DAS software too.

Wire and wireless sensors can be integrated with WT-012 through HART protocol or analog and digital signals. Vesta_DAS software is capable of calculating special parameters that are crucial for a well test job and at the end it can generate datasheets and job report in Excel, Word and pdf format.

- Support Max 32 channels of digital , analog and high frequency counter
- Communicate with PC through Ethernet and Wi-Fi
- Life time software license
- Record the data in standard Excel and trend format
- Can be monitored with mobile phone and tablet
- Can be monitored through Internet and LAN
- v32 GB internal storage
- Complete portable package
